TEST – so that the day-care centres remain open!

Dear parents,

Would you like to do something good for your youngsters, and together be responsible for their carefree play, and singing of the children in the day-care centre with us?

Please test your child 3x a week with the new Lollipop tests,

which also responds to the Omicron variant and will be available to all child day care facilities and child day care centres, from the new year onwards.

Testing helps identify infected people and break transmissions early.

The tests can help to keep day-care centres open and to be able to act as early as possible.

With regular testing, you also protect yourself and your family. In this way, an infection can be detected as early as possible, and its further spread prevented.

You can get the Lollipop tests free of charge at the day-care centre or from your childminder. Please help yourself.

With kind regards

A.Körber
